

TANGO

Description:

WATERLESS WASH & SHINE

FEATURES

- Great for use in areas where vehicle washing is restricted by drought orders or water shortages.
- Water-free application, unlike conventional shampoos
- Cleans and shines in one operation – no water required
- Dirt is lifted to surface and encapsulated in chemical solution
- Leaves an excellent shine

HOW IT WORKS

How it cleans is due to a combination of the cloth and chemical.

Tango contains solvent and cleaning agents to penetrate and lift the dirt - this is encapsulated by the product and then absorbed into the microfibre cloth.

Tango also contains silicones and gloss agents which are designed to stick to paint and not cloth so these remain on the surface to give a glossy finish.
